

June 25, 2021 Joint Methods & CI Working Group Call

Attendees: Lyndsie Wszola, Josh Cullen, Denis Valle, Kelly Heilman, Jody Peters, Hassan Moustahfid, David LeBauer, Quinn Thomas

Agenda/Notes:

1. [NEON Ecological Forecast Challenge](#) CI Update
 - a. Carl and Quinn need to work with CyVerse to get data on VM to move over to iRods. Set up the partnership but weren't ready to deal with S3 buckets or have them persist on their data store, but now they are.
2. Uncertainty Quantification & Propagation, Modeling & Stats Task View Update - now online! <https://projects.ecoforecast.org/taskviews/>

There are a few minor edits and clarification that needs to happen, but for the most part, Jody thinks it is ready.
3. Visualization/Decision Support Tools, User Interface Task View
 - a. Use the [Task View 1 on Reproducible Workflows](#) as a guide
 - b. We spent the call talking about the goals of the Task View, discussing what we already have, and brainstorming tools to include in this Task View.
4. Data Ingest, Cleaning, Management
 - a. Placeholder until we are further along with the other Task Views or have an identified leader for this
 - b. Jake too busy to lead in the next few months
